

Effective from: 1st December 2017

If you store the following agrichemicals in Quantities that are greater than what is shown below, then you will need a Hazardous Substances Location Certificate which has a life of 36 months from the date of issue. This will require a Worksafe Approved Compliance Certifier for Agrichemicals to visit your place of work to ensure that your staff training, storage, records, tracking data **(6.1A & 6.1B only)** and Emergency procedures meet the new Health & Safety at Work Act & Hazardous Property Regulations.

Commencement date: **01/12/2019**

Storage on properties that are not farms or less than 4 hectares

- 6.1A Qtys > 50 kg/ℓ
- 6.1B Qtys > 250 kg/ℓ
- 6.1C Qtys > 1000 kg/ℓ
- 8.2A Qtys > 50 kg/ℓ
- 8.2B Qty's >250 kg/ℓ

For farms greater than 4 hectares and being farmed

- 6.1A Qtys > 100kg/ℓ
- 6.1B Qtys > 500kg/ℓ
- 6.1C Qtys > 3500kg/ℓ
- 8.2A Qtys > 500kg/ℓ
- 8.2B Qty's >3500kg/ℓ

If you store quantities that are **less than** the above, then you will need to meet the same requirements, but you will not require to hold a Hazardous Substances Location Certificate. (HSL)

Threshold quantities for Hazardous substance location + Compliance certificate for areas **less than 4 hectares**:

Hazard classification	Quantity beyond which controls apply (closed containers)
3.1A (petrol/avgas)	50ℓ
3.1B	Containers greater than 5ℓ = 100ℓ Containers less than 5ℓ = 250ℓ
3.1C	Containers greater than 5ℓ = 500ℓ Containers less than 5ℓ = 1500ℓ

Please see below a list of Agrichemicals that are HSNO Classes **3.1B, 3.1C, 6.1A, 6.1B, 6.1C, 8.2A & 8.2B.**

Please tick the boxes if you **store**, and **Maximum Quantities** that you are likely to store.
